

FOR WEDDING & EVENT VENUES

findmyseat[™]
by smokedesign

A smoother arrival for every wedding at your venue.

Guests search their name on their own phone and see their table, section, floor, and exactly where it is on a map of **your** hall.

The seating board is the busiest spot in the room

At a large wedding, hundreds of guests arrive at once and head to one printed board. Your staff end up answering the same question again and again.

Without Find My Seat

- ✗ Crowding around one printed board at the entrance
- ✗ Small print, which older guests struggle to read
- ✗ Guests find their number but not the table itself
- ✗ Staff repeatedly asked "Where is table 28?"
- ✗ Confusion over sides, sections and the balcony
- ✗ Last-minute changes mean crossing names out by hand
- ✗ Speeches and food start late while people find seats

With Find My Seat

- ✓ Guests scan a QR code as they arrive, with no queue at the board
- ✓ Large, clear text on their own phone
- ✓ Their table lights up on a map of your hall
- ✓ Staff are free to welcome guests and serve
- ✓ The right section and floor, with "please go upstairs" for balcony tables
- ✓ Changes go live instantly and the QR code never changes
- ✓ Everyone is seated sooner and the evening runs to time

"It does more than tell guests their table number: it shows them exactly where the table is in your venue."

MADE FOR

200+ guest weddings

where one board can't cope with the arrival rush

Separate sides & sections

including Asian and Muslim weddings with bride's and groom's sides

Balconies & multiple halls

so guests are sent to the right floor or room

Galas, awards & dinners

any seated event, with your own section names

Scan. Search. Find your seat.

Every wedding gets its own personalised page in the couple's colours. Guests open it from a QR code on a welcome sign, the table plan or the invitation.

1

Scan

Guests scan the QR code or tap the link. It opens straight away on iPhone or Android.

2

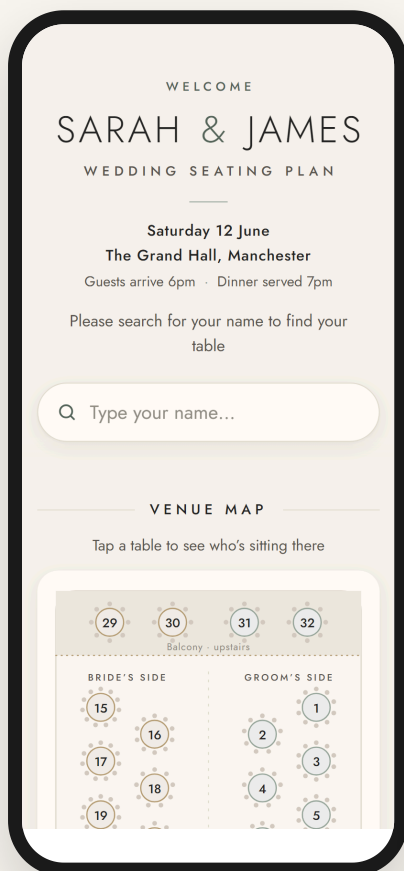

Search

They type their name. Spelling mistakes are fine: "Hanna Jons" still finds Hana Jones.

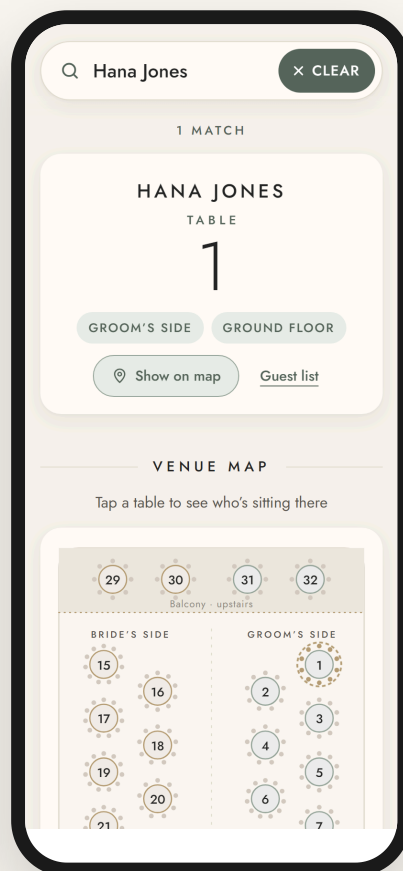

3

Find

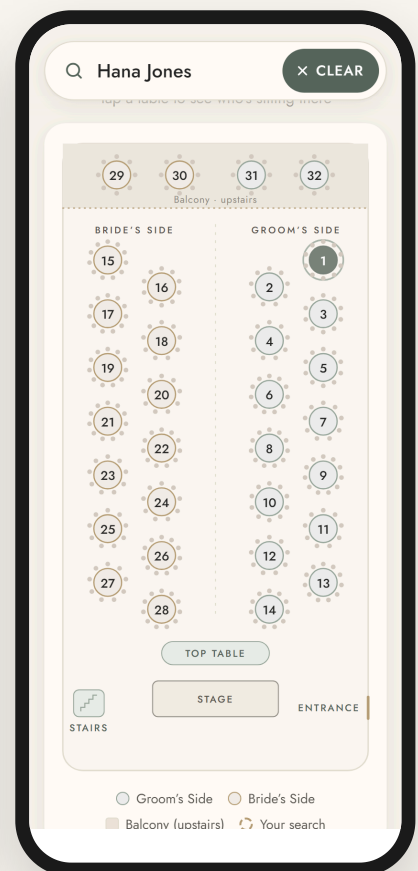

They see their table, side and floor, then tap "Show on map" to see where to walk.

The couple's page

Their table

Their table on your map

We map your hall once, and every future couple benefits

We trace your venue's floor plan, including sides, sections, the stage, top table, entrances, stairs and balcony. After that, every wedding you host can use an accurate map straight away.

- ✓ **Multiple sections:** bride's and groom's sides, family, VIP or any names you like
- ✓ **Balconies and upper floors:** guests are told to go upstairs
- ✓ **Multiple rooms and halls** in one venue
- ✓ **Landmarks:** stage, top table, entrances and stairs, so guests can orient themselves

- ✓ **Not just weddings:** charity dinners, awards nights, conferences and corporate dinners
- ✓ The wording adapts to the event: "Sponsors / VIP" instead of "Bride's side"
- ✓ Themed to each couple's colours and fonts
- ✓ Works alongside your printed seating board, not instead of it

Almost no work for your team

We do the set-up. Your team only needs to share the floor plan once and put a QR code where guests arrive.

- 1 We map your venue once.** Send us your floor plan (a photo is fine). We build your map and keep it for every future event.
- 2 A couple books.** You recommend it, or it's included in your package. Couples book and pay online with us.
- 3 We set up their page.** The couple sends their guest list and table plan (Excel, a photo or a typed list). It's usually ready within 48 hours, and every name is checked for duplicates and missing tables.
- 4 The couple approves it.** They get a private preview link, check every name and table, then tap "Approve" or request corrections. No surprises on the day.
- 5 The QR code goes up.** A print-ready QR code for the welcome sign, the table plan, place cards or invitations.
- 6 On the day.** Guests find their own seats. Your staff can welcome, serve and keep the evening on time.
- 7 Afterwards.** The page closes automatically and guest names are deleted.

What we need from you

- ✓ Your floor plan, once
- ✓ A spot for a QR sign at the entrance or the seating board
- ✓ Optional: add it to your wedding packages

What your team notices

- ✓ Far fewer "where's my table?" questions
- ✓ No crowd blocking the entrance
- ✓ Guests seated faster, so service starts on time
- ✓ No technology for staff to learn

WELCOME

Find your seat

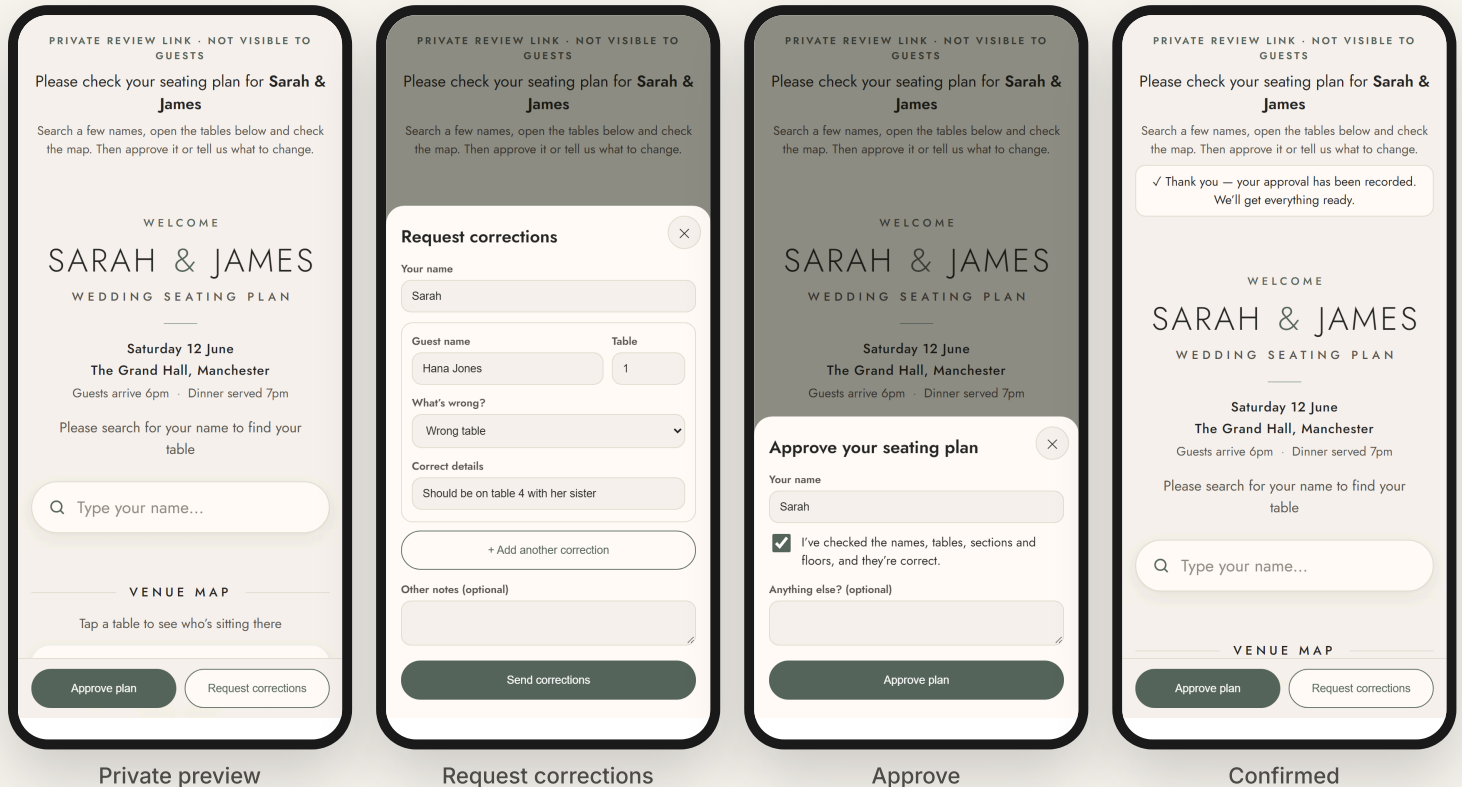

Scan · type your name · follow the map

Couples approve their plan before the day

Seating mistakes are stressful for couples and awkward for venue staff. Every couple gets a private preview link and signs the plan off before guests see it.

- ✓ Couples see the plan exactly as guests will
- ✓ Corrections are listed guest by guest: spelling, wrong table, missing or remove
- ✓ Approval is recorded with the name, date and a saved copy

- ✓ Last-minute changes are fine: updates appear instantly
- ✓ The QR code never changes, so printed signs keep working
- ✓ Optional PIN for extra privacy

Recommend it to your couples, and earn commission

Venues that recommend Find My Seat get a free private partner dashboard, their own referral link and QR code, and commission on every booking made through them.

Your dashboard

Your referrals

Ready-made messages

Your printable flyer

- ✓ **Your own referral link and QR code:** bookings through it are credited to you
- ✓ **Commission** on every booked wedding, at a rate agreed with you
- ✓ **Track it all:** couples referred, booked, commission earned, paid and due

- ✓ **Printable A5 flyer** saying "Recommended by [your venue]", for wedding packs and show-rounds
- ✓ **Ready-to-send** WhatsApp, Instagram and email text
- ✓ Referrals show first names only, so couples' privacy is kept

Simple, one-off prices

One price per event, paid securely online when the couple books. Or talk to us about including it in your packages.

	MOST POPULAR	
Essential	Signature	Bespoke
£99	£149	£199
Everything guests need to find their seat.	Their colours and an interactive venue map.	Large weddings and bespoke layouts.
✓ Searchable names, tolerant of typos ✓ Table, side and floor ✓ Elegant standard design ✓ Print-ready QR code	✓ Everything in Essential ✓ Custom colours and fonts ✓ Interactive map of the venue ✓ Balcony and upstairs directions	✓ Everything in Signature ✓ 500+ guests ✓ Map traced from the floor plan ✓ Changes up to the day, optional PIN

Privacy & data

We store only guest names and table numbers, with no contact details. Pages are hidden from Google, can be PIN-protected, and close automatically after the event, when names are deleted.

Does it replace our seating board?

No, they work together. Keep your printed board for the look and photos; guests who can't see it simply search on their phone.

Do guests need an app or an account?

No. They scan and the page opens, on any iPhone or Android phone.

What if the Wi-Fi is poor?

The page is very light and loads over normal mobile data. Guests can also open it before they arrive from the couple's WhatsApp message.

Can it be changed on the day?

Yes. Changes appear instantly and the QR code stays the same.

How quickly can it be ready?

Usually within 48 hours of receiving the guest list. Rush set-ups are possible.

NEXT STEPS

See it with your own venue

We'll show you the whole guest journey in under 10 minutes.

PILOT OFFER FOR VENUES

We'll set up Find My Seat free for one of your upcoming large weddings

We map your venue once. All we need is the couple's guest list and table plan.

Try the live demo

A real example with invented names. Search "Hana Jones", then tap "Show on map".
